

Start	Stop	Continue	Enhancements On Board
More conscious around naming conventions and organizing CSS classes and functions. Need to map out a game plan first.	Stop looking at the whole problem.	Breaking down problems to their smallest form and then tackle one at a time.	Implement feedback form functionality (Dec 2016)
Not being afraid to ask questions after being stuck after 20 minutes.	Allow instant negative thoughts to get the best of me.	Use Pivotal Tracker for user story progress, bugs, and chores.	
Using branches in GitHub and then merging with Master when a new feature works.		Positive mindset!!! Growth thinking! Motto: "Got this, love this. Always a way!"	
Get UI and UX feedback earlier - perhaps after drawing up wireframes.		Not overthinking - jump into the project and start asap!	
Accomplish hard functionality item first.		Use a CSS Framework.	
Review color scheme options and appropriate combinations.		Don't be married to an idea or image - agile way is that you may need to change it!	
		Use the whiteboard to download brain thoughts.	
		Using daily game plans - what is the focus of the day	
		Use wireframes to draw out site.	
		Take time to plan the project and complete user stories.	
		Practice working with AJAX and JSON.	
		Working on tasks I know how to do if there isn't an available resource and I am stuck.	
		Commit and push often to GitHub.	
		Deploy early and often.	
		Spend time planning: Wireframes, User Cases, Requirements	
		Practice working with JQuery and Javascript to manipulate DOM.	
		Create a README file in GitHub for every project.	
		Beathe and take a break when times get tough. Use Pomodoro timer!	
		Research, research, research!	
		Turn off Flux when designing.	
		Keep lists of questions, bugs, and thoughts.
